Digital Wallcoverings
Reimagined

one vision

For over 25 years, we have been creating wallcovering solutions for commercial interiors with the power to transform even the most basic space into an experience.

But the truth is, what makes our projects most special is the collaboration with you. You inspire us to help you create stunning rooms and one-of-a-kind spaces that change the way we interact with our environment.

This book is dedicated to the artists, designers, architects, specifiers, and visionaries that continue to improve the space around us all and bring art into our everyday lives.

**one team. one goal. one vision.
interiors people rave about.**

eco wallcoverings

Durable. Impactful. Environmental.

You don't have to sacrifice quality or creative expression for eco-friendliness. Our **ECO Wallcoverings** combine **UL GREENGUARD Gold Certified** inks with **Clean Vinyl Technology™** ("CVT") base materials. CVT materials replace chemicals typically found in vinyl wallcoverings with safe alternatives.

great idea for pop gloss:

Try using **pop gloss** to tell a story on your walls! Instead of just glossing certain elements of a design, use pop gloss to **create an entirely new element** like the words shown here.

Then watch as that **image flows in and out** of your vision as you move along the wall!

in action!

L16-0605MWG Equal Voices - Fall Spice

All of the words are created by printing pop gloss over the background colors. The words flash with intensity as the light dances across them!

wall protection

Is heavy traffic wrecking your walls?

We've got you covered with **Targa**.

Targa is a clear PETG sheet, .040" thick, with the **image printed on the back side** of the material, **encapsulating it** against the wall and protecting it from wear and abrasion.

These **rigid panels absorb the impact** from objects like hospital gurneys, luggage carts, and more, maintaining the integrity of the wall. It can be installed with the panels butt-fitted together or with optional trim pieces available through Level.

Any design in the Level collection can be **specified with Targa** as its base material!

Completely free of Phthalates, Both Halogenated and Bromated Fire Retardants (HFR & BFR),
Persistent Bio-accumulative Toxins (PBT), Bisphenol-A (BPA)

Targa is available in both **4' x 8'** & **4' x 10'** sheets and is **precision-trimmed** at the factory. It's an ideal solution for wall surfaces that are susceptible to damage in high traffic areas:

- Hospitals & Medical Offices
- Restaurants & Dining Halls
- Hotel Elevators & Lobbies
- Schools & Universities
- Gyms & Fitness Centers
- Airports & Public Buildings

ABOVE CHAIR RAIL: L16-1205 Calming Aura - Sunny Day | Printed on vinyl.
BELOW CHAIR RAIL: L16-1003 Styled Stripe - Midori | Printed on Targa.

something to consider:

Since most **damage from luggage, gurneys, carts**, etc. is on the **lower half of the wall**, try **Targa as a wainscot** below chair rail height. Then **use ECO or vinyl above the chair rail** where there's less need for protection.

liner notes: beach time

These **whimsical** beach-goers will transport anyone to thoughts of **fun** in the sun.

But if they just **aren't** your style, we'll gladly **remove them** all and you can have the beach all to yourself.

That's **custom made easy!**

high-end look on a budget

Check out our **high-resolution scans** of real wood veneer **printed** on any of our materials! A great budget option where real wood can't meet performance or durability requirements, like high-traffic areas.

Print the veneer alone or **use it as a background** with a Level design!

Add **metallic and pop gloss effects** to your wood!

Print on **acoustic panels to create faux wood beams** or dimensional faux wood panels where sound control is needed.

In tall spaces, use **wood veneer images in combination with real wood:** Real wood at eye level and veneer images up toward or on the ceiling.
