Permeability, Moisture and Mold:

Contains anti-microbial additives to resist the grown of mildew and bacteria and pass ASTM G-21. These additives will not prevent mold growth if residual wall moisture is in excess of 4% and/or is allowed to accumulate in or behind the walls.
Vinyl wallcovering can act as a vapor barrier and consequently should NOT be installed on walls that are susceptible to excessive condensation or moisture infiltration.
Breathe Free™ Micro-vented wallcovering from Colour&Design Wall can be used to help control un-wanted moisture inside a building envelope.

INSTALLATION NOTE
FARRAH CHEVRON™ is a reverse match pattern
