

INVISICAP

complete chemical protection

As the COVID-19 era drives the urgency for more aggressive cleaning and disinfecting programs across all commercial interiors, many wall finishes will not tolerate repeated application of harsh chemical disinfectants. Into this void, JJ introduces an effective new solution.

Applying InvisiCap PVF film to JJ's industry-leading designs will ensure **complete chemical protection** for your wallcovering, while preserving the nuanced, natural looks of JJ silks, linens, woven textures, and other designs.

Ordered as a custom run, with normal JJ lead times, InvisiCap protects against **all cleaning and disinfecting chemicals, in any concentration**. When a facility needs natural-looking wallcovering with no cleaning limitation, specify InvisiCap on almost any JJ pattern.

- Installation/handling
 - Same guidelines as for type II installation
 - Wrapped corners, short returns ok
 - Can horizontal "railroad" install, under chair rail
 - Pliability excellent, not crease-prone
- Performance
 - High Visual Clarity (see sample)
 - NO CHANGE from disinfecting with any chemical
 - Impact strength (Gardner drop dart)
 - Light emboss: 28 in-lbs
 - Elevated Abrasion (test forthcoming)
- General testing
 - Weight: nominal 20 oz
 - Width: same range as standard pattern
 - Thickness: no change from type II version
 - Elevated tensile strength
 - Low VOC
 - Cal 1350 test forthcoming
 - ASTM E-84 fire test
 - results forthcoming
- Custom order
 - On existing JJ patterns
 - Exceptions: Tip prints, Metalline, other specialty constructions
 - 400 yd minimum (+15% overage)
 - Next: 800 yds (+10% overage), then 200 yd (+10%) increments thru 2000 yds
 - Request process
 - Normal JJ custom request (thru Marc Manzo)
 - S# assigned
 - Not available for micro-venting
- Samples
 - Strike-offs
 - Normal lead times (faster if existing sku available)
 - Mock-up = 400 yds order
